

Spotless Commercial Cleaning implement uOnboard after a demonstration at the Cleaning Show to increase efficiency and future-proof their business

Spotless Commercial Cleaning offers a range of premium cleaning and associated services across the United Kingdom. With over 35 years of experience the company employs over 1,600 team members and pride themselves on their customer-centric service and quality clean.

Spotless Commercial Cleaning was in need of a more efficient solution to streamline their Right to Work and Onboarding processes and ensure relevant forms were completed correctly and in a secure manner.

Optimising these processes while making their practices more environmentally friendly, concise and reliable was a key focus for the business.

"I met with Miles from uComply at the Cleaning Show in 2019 where Right to Work was our main focus. I explained what we required in terms of onboarding and when Miles agreed to look into this for us the decision to come to uComply was a no brainer!"

Carron Henley, Spotless Commercial Cleaning

Spotless Commercial Cleaning implement uOnboard after a demonstration at the Cleaning Show to increase efficiency and future-proof their business

Spotless Commercial Cleaning discovered uComply's services at the London Cleaning Show, and was keen to investigate how they could future-proof their business. uComply's product range not only provided increased information security, essential for GDPR, but ensured all the information required for onboarding was provided in the first instance, making the process far more efficient.

The uOnboard system also meant passport or visa documents could be checked electronically, bringing the Spotless Cleaning team and their client's comfort in the knowledge that all procedures are followed and recorded. Additionally all of our compliance forms necessary for employment were digitally captured which allowed for safe recruiting.

After only a few months, Spotless Commercial Cleaning rolled uOnboard out to around 70 managers and 6 Head Office staff spread across the whole of the UK. This reduced the need for paper forms, helping to minimise waste and save their HR team precious time.

"Previously our HR team were constantly chasing our managers out in the field to get the correct information for onboarding. Now with everything in one space on the app, there is far less clarification needed on the information we receive."

Carron Henley, Spotless Commercial Cleaning
